Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claims 2, 3, 25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The phrase "less than about" renders the claims indefinite. It has to be either "less than" or "about". See *Amgen, Inc. v. Chugai Pharmaceutical Co., Ltd.*, 18 USPQ2d 1016 (Fed. Cir. 1991).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-15, 18-22 and 24-29 are rejected under 35 U.S.C. 102(b or e) as being anticipated by Funamaya et al. 5,391,611, Zingg et al. 6,881,773 or Delabroye et al. 2005/0004285.

6. Funamaya et al. disclose polymer ion claim 1, flame retardants in claim 10, their concentration in column 9, lines 15-21, hydrotalcites in the column 9, lines 51-68, and hindered amines in the paragraph overlapping columns 11 and 12. Zingg et al. teach polymer, halogenated flame-retardants and HALS in claim 1, concentrations in claim 8

and hydrotalcites in column 25, lines 17-18. Delabroye et al. reveal polymer in claim 1, aromatic bromine compounds and their concentrations in paragraph 0026, hydrotalcite in paragraph 0029 and HALS with its concentrations in paragraph 0034. Applicants' claims are not novel.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Funamaya et al. 5,391,611, Zingg et al. 6,881,773 or Delabroye et al. 2005/0004285, in view of Hallenbeck et al. 6,225,387 or Capocci et al. 2003/0207969.

10. The primary references have been discussed already. Hallenbeck et al. display a hydrotalcite concentration of 0.2%-6.0% in claim 1. Capocci et al. divulge roofing

membranes in claim 41 made of a similar formulation than applicants'. It would have been obvious to one of ordinary skill in the art; at the time the invention was made, to use the hydrotalcite in the amounts indicated by Hallenbeck et al., since it is the typical amount one uses and to use the compositions for the purpose shown by Capocci et al. because similar formulations have been successfully used for that purpose.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekely whose telephone number is (571) 272-1124. The examiner can normally be reached on 7:00 a.m.-5:30 p.m. Tuesday-Friday.
